

In the Specification:

Please replace paragraph [016] with the following:

[016] Identical dual hook attaching members 50 are removably mounted in the slots 33 of each side member 14, 16. Referring now to Figs. 3, 4 and 5, each attaching member 50 includes a substantially four-sided body 52 which is bisected by a fore-and-aft extending vertical central plane, and a first hook 54 projecting upwardly from a first side 56 of the body 52 and adjacent to a first end or corner 58 of the body 52. A second hook 60 projects rearwardly from a second side 62 of the body 52 and is adjacent to a second end or corner 64 of the body 52. The second hook 60 projects from the body 52 in a direction which is generally perpendicularly with respect to the first hook 54. Both hooks 54 and 62 project parallel to the central plane of the body 52. The sides 56 and 62 are adjacent to each other and are joined at a third common corner 66. The body 52 forms a slot 68 which extends through the body 52 from the corner 66 and into both sides 56 and 62 and to the corner opposite corner 66. Weight reducing recesses are formed in the sides of the hooks 54 and 60.

Delete page 9, and the "Assignment" thereon.
